

Website Handover Document

Client: Jeyar Brightech

Developed by: R.D. Sourav

Date: September 2026

This document serves as a comprehensive guide to your new website, outlining its features, structure, and functional capabilities.

1. Website Overview

The Jeyar Brightech website is a modern, high-performance static web application designed to generate leads, educate customers on solar energy, and showcase the company's expertise in renewable energy solutions in Kerala.

2. Key Features & Technologies

- **Responsive Design:** Fully optimized for mobile phones, tablets, and desktop computers.
- **Dark/Light Mode:** Integrated theme toggling for user preference and modern aesthetics.
- **WhatsApp Integration:** Direct lead generation connecting customers straight to the business WhatsApp.
- **Blazing Fast Performance:** Built with pure HTML/CSS/JS for zero loading delays and excellent SEO rankings.

3. Page-by-Page Walkthrough

Home Page

The landing page provides a strong first impression with a dynamic hero section. It highlights the core benefits of switching to solar, features animated statistics (e.g., number of installations, years of experience), and offers clear calls-to-action.

About Us

Introduces the company's mission and the leadership team. It highlights the extensive experience of the founders and technical advisors, building trust and authority in the Kerala market. The team section includes:

- Mr. Santhosh Kumar J. R. (Founder & Managing Director)
- Mr. E R Austin John (Co-Founder & Director)
- Mr. Hari Namboodiri (Brand Ambassador)
- Mr. Rajesh Kumar (Technical Advisor)
- Mr. R.D. Sourav (IT Head)

Solar Calculator

A flagship interactive feature designed specifically for KSEB domestic consumers. Users input their current bill, and the calculator provides:

- Reverse-calculated monthly unit consumption.
- Recommended solar plant size (kWp) to achieve a zero bill.
- Estimated financial savings (including Net Metering export profits at ₹2.69/unit).
- Dynamic Payback Period calculation based on tiered installation costs.
- Environmental impact (Trees planted & CO2 offset).

Installations (Gallery)

A visual showcase of completed projects. It displays high-quality images of rooftop installations, demonstrating the structural integrity and aesthetic quality of the tier-1 solar modules mounted on 16-gauge pipes.

Specifications & Hardware

A technical page detailing the premium components used in Jeyar Brightech installations, including Tier-1 Topcon Panels, Smart Inverters, and structural materials. This page appeals to research-heavy consumers.

FAQs

An interactive accordion-style frequently asked questions section addressing common customer concerns about maintenance, warranties, KSEB subsidies, and installation timelines.

Contact

Provides all necessary business information including the physical address in Thiruvananthapuram, phone numbers, and the official email address (jeyarbrightech@gmail.com). It features a streamlined contact form that routes inquiries directly to the sales team.

4. Maintenance & Hosting

The website is hosted on a highly reliable, global content delivery network (CDN) via GitHub Pages. This ensures 99.9% uptime and enterprise-grade security at zero monthly hosting cost.

The domain is managed via GoDaddy and is secured with a free, auto-renewing SSL Certificate (HTTPS) to ensure customer data privacy.
